## KIRILL PLATONKIN / JEREMIE MATHES ILIOU PERSIS / ROMAN KHARKOVSKY

### **KIRILL PLATONKIN** : *emotional power drones of a higher beauty*

This artist from Blagoveshchensk (the very east Amur region of Russia) excites with two Guitar-Drone pieces showing a very 'direct' mixing (no fading), revealing a highly energetic, yet completely elevating character...."a free interpretation of a magic flight on some air or space transport" (the artist's description about one of the tracks).

### **JEREMIE MATHES**: *cavernous metal tank drones*

A drone newcomer from France (who is currently living in Cambodia) with so far three great releases on Mystery Sea / Basses Freq. - using field recordings as a basis... on "Uunartoq Qeqertop", his contribution for MIND-04, we hear raw materials that were collected in an reverberant metal tank, reaching out for "density, emptiness, accumulation, disintegration, evolving with altered collages and processed sound from the original material " [Jeremie Mathes]

### **ILIOU PERSIS**: *surrealistic drones inspired by the psychology of masks*

"... an enormous amount of power appears to explode from some silent part of my brain and I look at myself behaving more animalistic than an animal, less human than a walking god." [quote from the artist]

A highly interesting musician and anthropologist from Portugal is behind this project who is fascinated with the cultural & psychological implications of MASKS, which can transform the carriers consciousness in a strong way. The long track for MIND-04 is a journey into fascinating subconscious areas transformed into sound.
